Detroit, MI

Objective

Computer Science and Cognitive Science student with experience leading user-centered projects through research, cross-functional collaboration, and data-informed decision making. Passionate about translating complex human needs into accessible, trustworthy product experiences.

Education

University of Michigan - Ann Arbor

Aug. 2021 - June 2026

B.S. Computer Science | B.S. Cognitive Science | Minor in Music

Skills

Product Strategy • User Research & Evaluation Studies • Cross-Functional Collaboration • Data-Informed Decision Making • Survey & Workflow Design • Python • Git • LLM Prompting

Projects

Remember (Capstone)- Co-Founder + Developer

May 2026- June 2026

- Co-founded a memory-support application helping individuals with memory loss preserve relationships, memories, and trusted support systems through accessible technology.
- Led project coordination across a 5-person interdisciplinary team, scoping requirements and prioritizing features while balancing technical feasibility against accessibility and human-centered design needs.

Ethical Careers- Co-Founder + Developer

Oct. 2025- Dec. 2025

- Co-founded a platform enabling job seekers to evaluate employers on People, Planet, and Transparency metrics, translating an ambiguous ethical framework into scorable product features.
- Designed and ran a 17-participant evaluation study measuring change in user ethical awareness, using findings to shape onboarding and review-flow decisions.

Refill Your Cup - Founder/President

June 2023- Dec. 2024

- Founded and led a student mental-health organization, recruiting and managing a 6-member executive board and owning all programming decisions.
- Designed and facilitated 5 wellness events over 2 years, growing attendance to ~20 students/event; secured funding via student government grants.

Relevant Experience

National Alliance for Mental Illness (NAMI) Washtenaw County - Program Coordinator

Jul. 2024 - Oct. 2025

- Conducted 50+ intake screenings per cycle for cohorts of 11–15 participants; analyzed attendance and retention data to identify onboarding friction.
- Redesigned intake systems and registration workflows based on that analysis, improving accessibility and scalability; authored proposal for a new youth board role, adopted into org planning.

Intend-2-Attend (I2A) - Student Ambassador

Oct. 2022 - Present

- Mentored 2–3 students/semester through college planning while contributing to statewide programming reaching ~1,000 students annually.
- Co-developed and facilitated workshops on financial aid and college applications, adapting the approach per student background.

Girls in Engineering Academy - Instructor

Oct. 2022 - Aug. 2025

- Designed original CS curriculum from scratch for cohorts of 20–25 middle schoolers, teaching Python and Arduino fundamentals.
- Built pre/post assessment frameworks to measure comprehension, iterating instruction based on results; students showed 100%–600%+ gains in subject comprehension over the year.
